Weekly Report 2

Name Sudhanshu Bansal
Roll Number 170725
Club Programming Club
Project Internet of Things
Mentor Ayush Bansal

Targets set for the week

1. Create an app that would fetch the image

2. Deploy a server that could host the images

3. Find a api that will help in image processing

Progress/Achievements for the week

1. Learned to send json requests

2. Hosted a web server on microsoft azure

3. Created an android app that sends an image to the server

4. Got familiar with google cloud services which will be api required for the project

Future Work Plans

1. Use the api to give desired output

2. Create a dynamic database to store the output

3. Make a skill that would input user's "find it" request
